MICHAL MONETA
EXPERIENCED SOFTWARE ENGINEER, CTO, AND CPO

ABOUT ME

Currently pursuing a Bachelor of Science in Creative Technology, I am navigating a shift in my career trajectory. My diverse background in leadership and technology roles equips me with a versatile skill set and I am open to a broad spectrum of opportunities. Actively seeking part-time roles, I am committed to contributing my expertise to various projects and industries. I am eager to apply my adaptability and problem-solving skills, and I look forward to embracing new challenges and making a meaningful impact in any dynamic work environment.

PROFESSIONAL EXPERIENCE

2015 - 2022 | CO-FOUNDER, CTO, AND CPO
Mosaics Digital Technologies Ltd.

CO-FOUNDER

- Co-founded Mosaics, an insurtech startup specializing in legacy modernization solutions.
- Defined vision, mission, and strategic goals, while shaping a culture of innovation and fostering a collaborative team environment.

CTO (CHIEF TECHNOLOGY OFFICER)

- Spearheaded tech solutions for seamless legacy modernization, boosting efficiency.
- Led the development of scalable, secure architecture for successful modern tech integration.
- Conducted a client-centric analysis of existing systems, gaining a nuanced understanding of their technological landscape and challenges.
- Tailored product development and technology solutions to seamlessly integrate with diverse legacy architectures.

CPO (CHIEF PRODUCT OFFICER)

- Drove product strategy, overseeing innovative solutions bridging legacy systems and modern technologies.
- Collaborated on cross-functional teams to define roadmaps, prioritize features, and deliver high-quality products.
- Prioritized client-centric product development, maximizing value and establishing Mosaics as a trusted legacy integration partner.

2014 - 2015 | COURSE INSTRUCTOR
IDF - 8200 Unit

- Mentoring students, including professional and personal assistance.
- Lectured on technical subjects and reviewed students' exercises.
- Developed course guiding content in Python programming, computer networks, UNIX, and communication.

2013 - 2014 | NETWORK AND DATA ANALYST
IDF - 8200 Unit

- Developed Python modules for analyzing and parsing networks and data, including complex SQL queries.
- Conducted research in the fields of file formats, computer networks, information security, network protocols, and network components.
